

Urban Sustainability Through Environmental Design

Approaches to Time, People and Place Responsive Urban Spaces

Edited by:

Kevin Thwaites, University of Sheffield, UK

Sergio Porta, Politecnico di Milano, Italy,

Ombretta Romice, University of Strathclyde, UK and

Mark Greaves, Glasgow City Council

What can architects, landscape architects and urban designers do to make urban open spaces, streets and squares, more responsive, lively and safe?

Urban Sustainability through Environmental Design answers this question by providing the analytical tools and practical methodologies that can be employed for sustainable solutions to the design and management of urban environments. The book calls into question the capability of 'quick-fix' development solutions to provide the establishment of fixed communities and suggests a more time-conscious and evolutionary approach.

This is the first significant book to draw together a pan-European view on sustainable urban design with a specific focus on social sustainability. It presents an innovative approach that focuses on the tools of urban analysis rather than the interventions themselves. With its practical approach and wide-ranging discussion, this book will appeal to all those involved in producing communities and spaces for sustainable living, from students to academics through to decision makers and professional leaders.

November 2007:

Hb: 978-0-415-39547-2 **£85.00**

Pb: 978-0-415-38480-3 **£27.00**

Contents

Part I: Time-conscious urban design **Section One:** The unsustainable lasting of time-unconscious urban design
Section Two: A common ground—space and people **Section Three:** Time-conscious urban design—clues to a starting point **Part II:** Analysis for the sustainable city **Part III:** Conclusion
